

Lina Jeffers

Computer Science and Human Factors Engineering student specializing in audio engineering and accessibility solutions with experience developing as a full-stack intern at various companies from startups to nationwide companies.

Tufts University, Somerville, MA

2023 - Present

- Pursuing degrees in **Computer Science, Human Factors, and Music Engineering**
- Expected Graduation: 2027
- **Relevant Coursework:** Database Systems, Artificial Intelligence, Assistive Technology Foundations, Human-Robot Interaction

RELEVANT WORK EXPERIENCE

Tufts University, Medford, MA — *Music Events Technical Staff*

September 2024 - Present

- Working on 9 person team to run technical production, monitor, microphone, and speaker setup, multi-track audio/video streaming, recording, signal processing, and post-production of approximately 200 events per year across multiple venues.

Tufts CEEO, Medford, MA — *Music Engineering Teaching Fellow*

June 2026 - August 2026

- Developing and carrying out engineering curricula for a 2 week pre-college class of 34 students covering acoustic and electronic instrument design, music recording and production, and acoustics.
- Synthesizing student feedback to iterate on program design for ongoing college level workshops

Drive Capital, Columbus, OH — *Summer Software Engineering Intern*

Member of internal engineering team. Building investment platform for leading venture capital firm.

June 2024 - August 2024

- Partnering with the Director of Engineering and Data Scientist to integrate new program into the company platform and assist seed team investors to discover new startups and trigger new partnerships.
- Designing, implementing, and upkeeping a Python and Django backend system to filter and send email updates on LinkedIn profiles.
- Working from a rough problem statement through project planning, implementation, and user feedback based iteration.
- Regular code reviews and weekly standup meetings.
- Setting up autonomous http request endpoints with APIs (Coresignal, Gmail, etc)
- Documenting work through architecture diagrams and detailed unit testing.

The Ohio State University Center for Automotive Research, Columbus, OH — *Summer Research Intern*

May 2022 - August 2022

- Working with MXP and Arduino microcontrollers to integrate a Python, MatLAB, and Simulink based CAN system to control a Mustang IPC from a physical interface.

Medford, MA 02155

(614) 705-9254

Linasjeffers@gmail.com

SKILLS

Java, C++, Python, SQL

UX and Usability Testing and Interviews, Iterative Design

Solidworks/CAD Softwares

Adobe Premiere, Photoshop, Illustrator, and InDesign

Adaptability, Communication, and Project Management

Pro-Tools, Reaper, Digital Performer, Audacity, QLab

ORGANIZATIONS

Tufts Wilderness Orientation — *Program Coordinator*

December 2024 - Present

- Hiring, supervising, training, and directly managing a staff of 100+ undergraduate students
- Writing and iterating on staff training curricula through regular feedback and assessment
- Planning and overseeing over thirty five-day wilderness trips across 3 states
- Coordinating communication with over 300 first-year students and their families
- Leading 5 day backpacking and trail maintenance trip of 7 first year students in Vermont

Jumbocode — *Developer*

September 2025 - Present

- Collaborating on small student teams to create web apps using Postgres SQL databases, [Next.js](#) and React

Torn Ticket II, Tufts Department of Theater Dance and Performance Studies— *Sound Engineer and Props Designer*

September 2023 - Present

- Collaborating with professional audio engineers and designers to determine signal flow and mic arrangement for department run musicals and performances
- Setting up and operating 20+ microphones, running sound checks for actor and pit orchestra mics, troubleshooting frequency interference and feedback issues during musical performances
- Live mixing 20+ actor and orchestra mics on Yamaha and Digico mixing consoles
